

Himanshu Pethe

Qtr. No. E-107 Nandanvan colony, Nagpur, Maharashtra 440024, India | himanshupethe08092003@gmail.com | 7758874752 | [LinkedIn](#)

I believe that great software is built at the intersection of robust logic and human needs. As a recent graduate, I've spent my time getting my hands into Node.js and Python - developing everything from e-commerce features to student assessment flows. I don't just write code, I enjoy digging into the SQL data to understand why a feature works (or why it doesn't). I'm looking to join a team where I can contribute to meaningful projects, keep learning, and grow alongside fellow innovators.

Education

St. Vincent Pallotti College of Engineering & Technology, Nagpur Bachelors in Computer Science and Engineering (Data Science), Member of SRC and conducted event "Nebula Nexus". CGPA: 7.81	Dec 2021 to Jul 2025
Decent Junior College, Nagpur Higher Secondary School Certificate, 12th Score: 97.33%	Jun 2019 to Aug 2021
Sanjuba High School, Nagpur Secondary School Certificate, 10th Score: 85.6%	Jun 2009 to May 2019

Professional Experience

MERN Developer Intern, Yash Industries, Nagpur • Worked as a MERN Developer Intern at Yash Industries, leading a team in developing a web application for HR, students, and colleges. • Developing both frontend and backend using MongoDB, Express.js, HTML/CSS, React.js, and Node.js to ensure seamless functionality and performance. • QA & Testing Focus: Performed Unit Testing on APIs using Postman to make sure data was being sent and received correctly. • Building key features, including HR job postings, student selection based on scores, college conducted practice tests, and an e-commerce section for courses and test series.	Dec 2024 to May 2025
Web Developer Intern, Alaaddin & Co, Nagpur • Developed and maintained web applications using HTML, CSS, JS and MySQL enhancing functionality and user experience. • Contributed to the Client and Vendor Management System project, focusing on frontend development and database integration. • Gained hands-on experience with web development tools and best practices, improving coding, debugging, and deployment skills.	Jul 2024 to Jul 2024

Project

Flight Management System • I designed and developed a Flight Management System in Java, strictly applying Inheritance and Encapsulation to create a modular architecture that securely separates user roles from sensitive flight data. • This project bridged the gap between theory and practice, teaching me how to architect scalable solutions and maintain clean, reusable code in a real-world scenario. Skills: Basic Java, Object Oriented Programming	Jan 2026 to Feb 2026
HR-Student-Admin Job Application Platform • Developed a full-stack web platform enabling HRs to post job descriptions, colleges to conduct practice tests, and students to access job opportunities and learning resources. Led both frontend and backend development using JavaScript, Node.js, and MongoDB. • Performed unit testing on API using Postman. Skills: HTML5, CSS3, JavaScript, Node.js, MongoDB, Express.js.	Dec 2024 to May 2025
Client and Vendor Management System • Developed a Client and Vendor Management System as part of a team of four, streamlining the management of client and vendor data to improve operational efficiency. Integrated frontend with the backend database using JS and SQL, enabling seamless data retrieval, storage, and updates for client and vendor interactions and tested APIs using postman. • Enhanced system functionality by enabling efficient tracking of transactions, communications and interactions between clients and vendors, improving business workflow. Skill: HTML, CSS, JS, Node.js, MySQL, Express.js.	Sep 2024 to Dec 2024
Training and Placement Cell Management System • Developed a Training and Placement Cell Management System using Python and MySQL, optimizing student data and placement process management. Designed and implemented database architecture with RDBMS principles, ensuring efficient storage and retrieval of student records, job postings, and company details. • Collaborated in a team of two to automate placement activities, improving data accessibility and reducing manual effort in educational institutions. Skill: Python, MySQL, RDBMS.	Nov 2022 to Jan 2023

Technical Proficiencies

Languages:	Python, C, Core Java, JavaScript (ES6+), SQL
Frontend:	HTML, CSS, Streamlit
Backend:	Node.js, Express.js, REST API
Databases:	MySQL, MongoDB (Basic)
Data Preprocessing:	Numpy, Pandas
Data Vizualization:	Matplotlib, Seaborn, Tableau
API Testing:	Postman

Certifications, Training and Web Links

SQL (HackerRank), MongoDB (training at MSIT), [HackerRank Portfolio](#) , [GitHub Portfolio](#)
