

HIMANSHU PETHE

+ 9 1 - 7758874752

Career objective-

Motivated Computer Science graduate seeking an entry level position to apply my expertise in MERN stack and Data Analytics. Eager to build efficient applications and solve complex problems to drive value for the organization and its clients.

Education			
Program	Institution	C.G.P.A/%	Completion
Bachelors in Computer Science and Engineering (Data Science)	St. Vincent Pallotti College of Engineering & Technology, Nagpur	7.81/10	2025
Higher Secondary School Certificate	Decent Junior College, Nagpur, Maharashtra	97.33%	2021
Secondary School Certificate	Sanjuba High School, Nagpur, Maharashtra	85.6%	2019

Experience	
YASH INDUSTRIES <i>(Dec'24 – May'25)</i> <i>Internship</i>	- Working as a MERN Developer Intern at Yash Industries, leading a team in developing a web application for HR, students, and colleges. - Developing both frontend and backend using MongoDB, Express.js, HTML/CSS, React.js, and Node.js to ensure seamless functionality and performance. - Building key features, including HR job postings, student selection based on scores, college conducted practice tests, and an e-commerce section for courses and test series.
ALAADDIN & CO <i>(Jul'24)</i> <i>Internship</i>	- Developed and maintained web applications using HTML, CSS and MySQL, enhancing functionality and user experience. - Contributed to the Client and Vendor Management System project, focusing on frontend development and database integration. - Gained hands-on experience with web development tools and best practices, improving coding, debugging, and deployment skills.

Projects	
E-Commerce Sales & Performance Dashboard	- Designed an interactive Power BI dashboard to visualize enterprise-scale retail data, tracking key performance indicators (KPIs) including \$12.64M in Total Sales and \$1.47M in Total Profit. - Developed geospatial visualizations to map Profit by Country and utilized Donut charts to analyze category performance, identifying "Phones" and "Chairs" as top revenue drivers. - Constructed time-series visualizations to monitor monthly sales fluctuations, aiding in the identification of seasonal demand patterns and shipping efficiency.
Wine Quality Predictive Analytics	- Developed a binary classification model using Random Forest, achieving 92.28% accuracy in predicting wine quality. - Conducted Exploratory Data Analysis (EDA) with Pandas and Seaborn to identify alcohol levels as the primary driver of quality ratings. - Optimized model performance using GridSearchCV for hyperparameter tuning across Random Forest, SVM, XGBoost, and Decision Tree algorithms.
Heart Attack Risk Prediction	- Developed a machine learning model to predict heart attack risk using a dataset of patient health metrics (e.g., Cholesterol, Blood Pressure, Heart Rate). - Performed data cleaning, preprocessing, and Exploratory Data Analysis (EDA) using Pandas, Matplotlib, and Seaborn to visualize trends and correlations. - Built and compared Decision Tree and Random Forest classifiers, utilizing GridSearchCV for hyperparameter tuning. Achieved a model accuracy of 64.17% with the optimized Random Forest algorithm. Tech Stack: Python, Scikit-learn, Pandas, NumPy.
HR-Student-Admin Job Application Platform	- Developed a full-stack web platform enabling HRs to post job descriptions, colleges to conduct practice tests, and students to access job opportunities and learning resources. Led both frontend and backend development using JavaScript, Node.js, SQL and MongoDB. - Skills: HTML5, CSS, Javascript, Node.js, MongoDB, SQL
TRAINING AND PLACEMENT CELL MANAGEMENT SYSTEM	- Developed a Training and Placement Cell Management System using Python and MySQL, optimizing student data and placement process management. - Designed and implemented database architecture with RDBMS principles, ensuring efficient storage and retrieval of student records, job postings, and company details. - Collaborated in a team of two to automate placement activities, improving data accessibility and reducing manual effort in educational institutions.

Skills and Others	
Programming Languages/Skills	Python, HTML/CSS, SQL, JavaScript, NoSQL, OOPs (Object Oriented Programming), API, Problem Solving, Databases, Machine Learning
Tools and Technology	Linux, Tableau, MongoDB, Node.js, Express.js, Git, REST API, Numpy, Pandas, Matplotlib, Scikit-learn, Streamlit, Data Cleaning & Processing, Power BI, Excel
Soft skills	Good communication, team work, versatile, Adaptable to New Technologies
Extra-Curricular Activities	Nebula Nexus (Organized CS:GO gaming event in college)
Certifications and Training	SQL (HackerRank), MongoDB (training at MSIT), CSS (HackerRank), Tableau (training at jobaaj)
